

# Verizon Transition Box for Wireline to Wireless (W2W) Applications

The Verizon Transition Box for Wireline to Wireless Applications (W2W) serves as the demarcation point between the backhaul fiber provider and the mobile network operator. The W2W Box features:

- Physical security and separation between wireline and wireless fiber connections
- Small footprint (13"L x 8"W x 3"D) with a variety of mounting options
- High fiber density — up to 48 LC fiber connections
- Clearfield FiberDeep® low-loss 0.2dB insertion loss on LC connections
- Pre-stubbed fiber assembly options
