

Description

The CraftSmart TAP Splice Box supports up to 2 subscribers. It is used as a termination point for the feeder cable to connect with the drop cable in FTTx network system, integrating fiber splicing, distribution, storage and cable connection in one solid protection box.

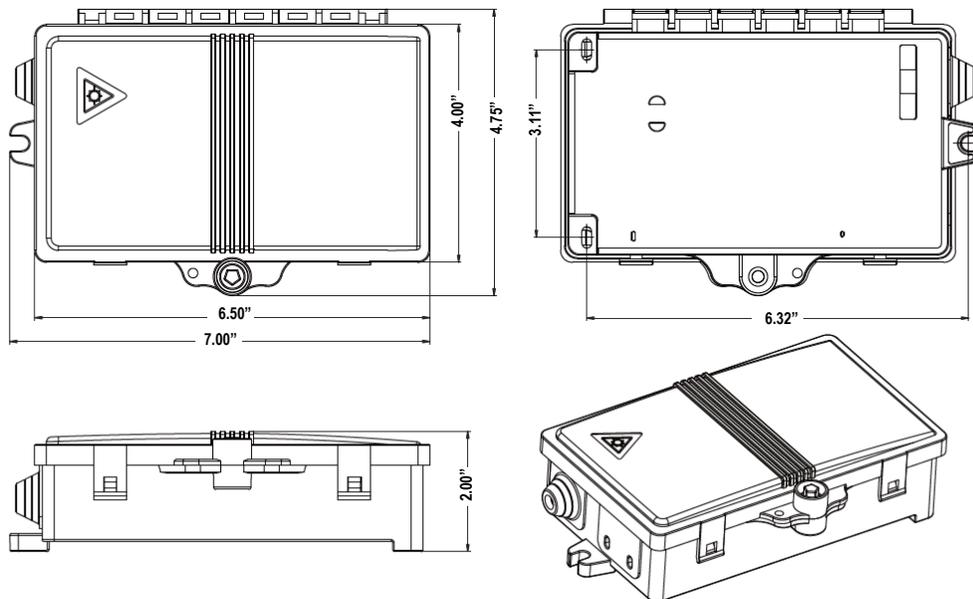

Features and Benefits

- Total enclosed structure: dust-proof, anti-aging, water-proof design with IP-66 protection level.
- Enclosure includes clamping for feeder cable and drop cable, fiber splicing, fiber storage and distribution ports.
- Cable, pigtails, patch cords have distinct cable management route paths for fiber protection. Splice tray and SC adapters are designed for easy installation and maintenance
- Installation options for wall or pole mounting and suitable for both indoor and outdoor uses.
- 2 ports cable entrance for drop cable.
