

Application

Engineered to land FTTH fiber terminations as conveniently as possible, the FieldSmart SCD TAP Box is optimized for delivery of FLEXdrop via a FLEXdrop Deploy Reel and Slack Storage Reel. The lockable enclosure is compact and sealed, making it ideal for a variety of applications, including harsh environment locations surrounding the fiber demarcation point. Additional applications include MDU and business class services.

Description

The FieldSmart SCD TAP Box offers single or dual count fiber deployment in a discrete footprint and without sacrificing proper fiber management. With the FieldSmart SCD TAP Box, enclosures are designed packaged to make FTTH more cost-effective and efficient than previously thought possible. Standardizing on a craft-friendly, building block architecture reduces the operating costs of fiber deployment by reducing installation times and inventory carrying requirements.

Features and Benefits

Integrity

- UV Stabilized
- Utilizing the FLEXdrop Deploy Reel, it supports industry standard SC and LC singlemode connectors
- Dual snap locks to ensure lid seals to base
- Mounting hole pattern for multiple applications

Protection

- Designed to comply to GR-771 and NEMA-4
- Gasket seal
- Ground lug included

Access

- One-Inch on center holes for easy installation of deploy reel mounting pin
- Easy to install with both internal and external mounting holes
- Two bottom entry/exit points utilizing multi-purpose strain reliefs
- Option for adapter mounting bracket

Investment

- Holds up to 200 feet of FLEXdrop on Deploy Reel, with 100 feet of 3mm cable slack storage
- Surface or pole mount capable
- Flame retardant PVC for durability
